Profile

I'm a software developer with over 2+ years of experience specializing in React.js, Next.js, Node.js, and Express. I have a strong background in building scalable and efficient web applications using MongoDB, Redux, and Redux Toolkit. I love tackling challenging problems and creating seamless user experiences. I'm also a great team player, able to collaborate effectively with others, and I stay updated on the latest technologies to ensure I'm always at the forefront of the industry. My goal is to continue growing my skills and contribute to exciting projects that make a difference.

Professional Experience

Softcolon Technology Private Limited,   04/2023 — present | Ahmedabad, India

Education

Bachelor of Science in Information Technology,   2019 — 2022
RKDF University

Projects

Event BASE
- Features separate portals for companies and users, allowing companies to post job opportunities and users to apply for them seamlessly.
- Users can customize their profiles, save job postings, and apply for multiple jobs, enhancing their job search experience.

- Advanced search functionality lets users and companies find each other based on specific preferences and criteria.
- Streamlined job application process with tools for users to track their applications and companies to manage job postings and candidates.

Creators Parade
- Users can design custom T-shirts, hoodies, and other apparel using an advanced custom editor built with the Konva.js library.
- Features for purchasing items, updating addresses, and viewing order history provide a seamless shopping experience.
- Creators have access to sales history and payment information, enabling them to track earnings from their designs.
- Integrated payment system supports secure transactions for both users buying products and creators receiving payments for their designs.

College Connect
- Secure access for students, teachers, and HODs with role-based permissions for efficient management.
- Direct messaging, discussion forums, and announcement features to enhance communication and collaboration among students, teachers, and HODs.
- Digital library system for searching, borrowing, and returning books, along with inventory management for librarians.
- Tools for creating and managing courses, uploading materials, and sharing resources, ensuring a centralized hub for academic activities.
